Aries® Managed Air System

The use of air/water backwash in filter systems has proven to be a far superior cleaning method to traditional water-only or water/surface wash methods, but the modification needed for it usually meant replacing underdrains. The costly and time-intensive work required for this conversion often prevents owners and municipalities from upgrading their systems.

Roberts innovative design solves that problem.

The Aries® Managed Air System was launched two decades ago to provide operators with a simple and cost-effective way to add air wash without requiring replacement of filter hardware.

Easy Installation

Unique installation method easily integrates with old filters. The Aries® Managed Air System can be installed and removed without replacing the filter media, and it is adaptable to any filter design with any media profile without the need for replacing the underdrain of the filter media.

Trustworthy

One of Roberts' most popular products, tested and proven in hundreds of applications.

Roberts Filter Group
Innovations for Generations

Water-Saving

Saves up to 70 percent of water regularly used in backwash. The Aries® Managed Air System provides "bottom to top" cleaning action which passive air systems do not. The location of the Aries® Managed Air System is at the gravel/media interface allowing the introduction of air directly into the bottom of the filter media.

Cost-Saving

Low-cost solution to dramatically improving an old system.

Energy-Saving

Aries® is twice as efficient as air/water underdrains.

Roberts Filter Group

The Roberts Filter Group is the largest family-owned water filtration company in the U.S. with more than 4,400 installations across six continents. It is a fifth-generation operation that began with one of the world's first patented water filters and has continued to develop pioneering, high-quality filtration products ever since. Today, Roberts continues to work with some of the smartest companies and engineers on the planet to answer the industry's demand for customized, flexible solutions and efficient operations.
